

THIRD PUBLIC MEETING FOR TOPANGA STATE PARK GENERAL PLAN

California State Parks (CSP) would like to invite you to the third public meeting for the Topanga State Park General Plan. The purpose of this meeting is to present the single (preferred) plan and support materials. After the presentation, the General Plan team, comprised of CSP landscape architects, environmental scientists, historians, archaeologists and park staff will be available to discuss this preferred plan.

The single plan was developed with the input received at the first and second public meetings held in September 2009 and July 2010.

Following the third public meeting, the General Plan team will prepare the preliminary General Plan which will then be available for public review and comment as per the California Environmental Quality Act (CEQA) process.

After the completion of the CEQA process, the General Plan Document will be presented to the California Parks and Recreation Commission which will entail a public hearing process including additional opportunity for public comment.

A General Plan is mandated for state parks units by the Public Resources Code. The plan becomes the primary management document for a unit of the State Park System, establishing its purpose and management direction for the future. The plan does not provide specific physical designs but does provide a vision for the park and guidelines for Future development.

Questions and comments may be directed to:
