Project Description:
The proposed project consists of the development of a new General Plan for Bidwell-Sacramento River State Park. The General Plan will guide future management direction at the Park over an approximate 20-year planning horizon. The General Plan contains a comprehensive and integrated set of park-wide goals and guidelines for the long-term management of the Park that focuses on protection of environmental resources, enhancements to visitor use and opportunities, and improvements to administration and operations of the Park. In addition, the General Plan provides a spatial dimension to Park planning through the use of area concept planning, which includes area-specific management and facility prescriptions for the subunits and potential property additions that have been considered in the planning process. A range of new recreation facilities are proposed at the Park, which include, but are not limited to, overnight campgrounds, day-use areas, trails, and a visitor center.
