

Redwood Forest EcologyNotebooking

THE WEB OF LIFE

Key Questions: Where does the energy that flows through ecosystems come from and how is it transferred through the food web?

List the organisms in the sample food web from the PowerPoint slides and draw a diagram on the next page.

List the organisms (plants & animals, decomposers) of the redwood forest ecosystem on the lines below:

After you make your food web cards and food web, draw your diagram below with **labels** (Use **P** for producers, **C** for consumers and **D** for decomposers). You may use the right side of your notebook too. → → →

Write a paragraph that explains how energy is transferred through your food web:
