17. \_\_\_\_\_ The population of elephant seals is decreasing.
18. \_\_\_\_\_ Elephant seals were almost extinct 100 years ago.
19. \_\_\_\_\_ Elephant seals were hunted for their tusks.
20. \_\_\_\_\_ Elephant seals can swim all the way to Alaska.

True or False (KEY)

1.   T        The ancestors of elephant seals lived on land.
2.   T        Elephant seals are mammals.
3.   T        Elephant seals dive deeper than most whales.
4.   T        Small changes in a species over time is called evolution.
5.   T        Elephant seals may have evolved from bear-like animals.
6.   F        Elephant seals evolved because they wanted to live in water.
7.   F        Elephant seal pups are born in the fall.
8.   T        An adaptation is a change that makes an animal better suited to its environment.
9.   F        Elephant seals cannot swim very far.
10.   T        Elephant seal males fight with each other for females.
11.   T        Elephant seal fat is called blubber.
12.   F        Elephant seals never come on land.
13.   F        Elephant seal mothers often feed pups that aren't their own.
14.   F        Pups are very fat when they are born.
15.   F        Males are very careful not to hurt the pups.
16.   T        White sharks eat elephant seals.
17.   F        The population of elephant seals is decreasing.
18.   T        Elephant seals were almost extinct 100 years ago.
19.   F        Elephant seals were hunted for their tusks.
20.   T        Elephant seals can swim all the way to Alaska.
