

## DID YOU KNOW THAT MELANOMA IS OFTEN 95-100% CURABLE IF CAUGHT EARLY AND TREATED QUICKLY?

Dear Parents,

The John Wayne Cancer Foundation Skin Cancer Education program is a southern California based youth outreach program which partners with the Hyundai Cancer Institute at Children's Hospital of Orange County (CHOC Children's) and UC Irvine Health to educate about sun safety and skin cancer with an emphasis on melanoma prevention and self-screening for early detection.

This summer, we've partnered with the CSLSA junior lifeguard programs from San Diego to Santa Cruz to educate and reinforce the importance of sun safety.

Your junior lifeguard will receive:

- A sun safety and Skin Cancer Education presentation
- 3oz tube of chemical free/all natural sunscreen
- Take-home sun safety and skin cancer information cards to review with friends and family

Watch our video from last season at: <http://vimeo.com/76902989>

To schedule a presentation at your local school or in your youth group please visit:  
[www.skincancereducation.johnwayne.org](http://www.skincancereducation.johnwayne.org)

Donate or buy sunscreen to support the program: [www.johnwayne.org](http://www.johnwayne.org)

Here's to a Sun Safe Summer,

**John Wayne Cancer Foundation**
