

36 minutes from Eureka

Sue-meg State Park displays a snapshot of geological processes that have shaped the face of western North America. The rocks exposed in the sea cliffs and offshore represent the interplay between a subducting oceanic tectonic plate and the continental North American tectonic plate. [View Park Brochure](#)

Day Trip Option

The 1-square-mile park is densely packed with potential adventures. A walk around the perimeter offers an opportunity to explore tide pools and walk through a jungle of shrubs and trees, while looking at seals, sea lions and migrating whales. In Sue-meg State Park's interior, there is a native plant garden and a reconstructed Yurok plank house village.

Tips on how to recreate responsibly during your visit are available at parks.ca.gov/SafetyTips.
