

Calaveras Big Trees State Park
Exhibit Room Scavenger Hunt

1. **Find the large photos in the hallway.** How many people can you find in the middle picture? Look carefully – it's a little tricky.
2. **Find the arrow** in the display about the Native American people. What is unusual about how it is made?
3. When the Big Trees were first discovered, people named some of the trees and nailed **marble plaques** to their bark. Three of the marble plaques are in this room. Find all three and write their names here:
4. **Find Discovering the Big Trees.** In 1853 a giant plumbing auger was used to cut down the Discovery Tree, which is now the Big Stump. Why did they use that instead of a saw?
5. All the **animals in the display** live in the park. Which one would you like to see out in the forest? Write its name and draw a sketch here:

6. **Find the bird display.** Choose one of the birds and write its name and one fact about it here:

7. **Find Millions of Years in the Making.** Touch the three rock samples.

Which one was the most rough?

The most smooth?

What is the name of the other type of rock?

INSIDE THE BIG TREE

8. **Find How Big Is Big?**

Which are taller, the Coast Redwoods or Giant Sequoias?

Which have a bigger diameter, Coast Redwoods or Giant Sequoias?

9. **Find Friend or Foe?** Choose one and make a guess. Flip the panel up for the answer.

Which one did you choose?

Is it a friend or foe of the Big Trees?

Explain why:

10. **Find the displays that talk about fire.** What is one way that fire helps the Giant Sequoias?

11. **Watch the 14-minute movie** if you have time.

What was your favorite part of the movie?

What is one new thing you learned from the movie?
