

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Este informe contiene información muy importante sobre su agua potable.
 Tradúzcalo o hable con alguien que lo entienda bien.

**Monitoring Requirements Not Met for
 CSP Limekiln
 Water System No. 2710306**

Our water system failed to monitor the drinking water supply during August and September 2012 and, therefore, was in violation of the state drinking water regulations. Even though this failure was not an emergency, as our customers, you have a right to know what you should do, what happened, and what we did to correct this situation.

We are required to monitor your drinking water for bacteriological contaminants on a monthly basis. Results of this monitoring are an indicator of whether or not our drinking water meets health standards. During the months of August and September 2012, the CSP Limekiln water system failed to collect samples for coliform bacteria analysis testing and therefore, cannot be sure of the quality of our drinking water during that time.

What should I do?

- There is nothing you need to do at this time.
- The table below lists the contaminant(s) we did not properly test for during the last year, how many samples we are required to take and how often, how many samples we took, when samples should have been taken, and the date on which follow-up samples were (or will be) taken.

<i>Contaminant</i>	<i>Required Sampling Frequency</i>	<i>Number of Samples Taken</i>	<i>When All Samples Should Have Been Taken</i>	<i>When Samples Were or Will Be Taken</i>
Coliform	Two samples every month	0	Two samples each during August and September 2012	Collection of two samples is scheduled for October 2012

- If you have health issues concerning the consumption of this water, you may wish to consult your doctor.
