Fire Restrictions in effect at Silverwood Lake

As a result of the extreme fire danger caused by the prolonged drought, California State Parks is implementing the following restrictions at Silverwood Lake until the fire season is over:

- Effective immediately, the backcountry areas of Silverwood Lake State recreation Area are closed to public entry and use. The Miller Canyon Day Use Area is also closed.
- Open fires, including campfires and barbecues, are prohibited in all areas of Silverwood Lake State Recreation Area. Portable camp stoves are still permitted for cooking within designated campsites.
- Smoking is only allowed within designated areas of developed facilities.

The restrictions are in coordination with similar restrictions put in place by the U.S. Forest Service.
