Background: Since 2008, State parks across California have been threatened with possible closure due to declining budgets. As an option to keep parks open and operating, Congressman Jared Huffman, as the then-Assembly member from Marin County, introduced AB 42, which allowed the state to explore partnerships with nonprofit organizations. On February 16, operating and matching fund agreements will be finalized with a signing ceremony at China Camp State Park. This signing is a prelude to as many as 50 additional agreements that are now in active negotiations and nearing a conclusion. **Press and public welcome to attend.** ###
