Get Involved in Planning the Future of Kings Beach State Recreation Area

Kings Beach, Calif.— California State Parks (State Parks) and the California Tahoe Conservancy (Conservancy) are collaborating to plan for the future of the Kings Beach State Recreation Area (SRA) and are soliciting your input on alternative elements for redevelopment of the SRA during preparation of a general plan revision and pier rebuild project.

Two public workshops on the project and to receive input on the alternatives will be held. The first will be hosted by State Parks and the Conservancy.

September 1, 2016
6:00 to 8:30 pm

North Tahoe Event Center
8318 North Lake Boulevard
Kings Beach, CA 96143

Written materials will be available in English and Spanish. The workshop will consist of an open house with information stations along with an opportunity the public to review and comment on alternative elements being considered. The workshop will be. A brief introductory presentation will commence at 6:15 p.m. Comments, suggestions and additional ideas related to features of the alternatives will help the planning team craft the preferred alternative, which will be presented at a third public workshop this fall.

The second workshop will be hosted by the Latino Leadership Committee.

**265 Bear Street
Kings Beach, CA 96143**

About the Kings Beach SRA Alternative Elements:

The **Eastern Pier Alternative** minimizes conflicts between different activities by aligning the promenade along SR 28 around picnic areas and creating a single boat access location. This alternative would:

- Maximize beach and swim areas by locating pier at the edge of the park
- Separate through bicycle traffic from beach use by providing a promenade closer to the road
- Provide a large central playground, event space, and lawn with easy beach access
- Remove the motorized boat ramp
- Increase the number of parking spaces and focus more parking on the eastern side of the park

The **Central Pier Alternative** emphasizes the central location of the pier and includes an entry plaza that connects the pier and beach to downtown Kings Beach. This alternative would:

- Focus visitor uses near the central pier and the eastern side of the park
- Provide an entry plaza that invites pedestrians to move between the beach, pier, and downtown
- Create a promenade near the edge of the beach that follows existing pathways
- Reconfigure the boat ramp to provide only non-motorized boat access
- Increase the number of parking spaces available in the park

The **Western Pier Alternative** spreads visitor use throughout the entire park by locating amenities in areas that receive less use. This alternative would:

- Create a more active area near the North Tahoe Event Center with a new pier and plaza
- Create a park like experience along a promenade at the edge of the beach
- Maximize beach and swim areas by locating the pier and boat ramp at the edges of the park
- Maintain motorized boat access and slightly extend the boat ramp
- Reduce the number of parking spaces available in the park

There are several easy ways for you to participate:

- Get on the mailing list by sending a note to plan.general@parks.ca.gov
- Visit our website at www.parks.ca.gov/plankbsra. Detailed interactive maps of the alternatives are available online, as well as online and downloadable surveys.
- Attend the public workshops. The website includes a public outreach schedule.
- Please submit your comments on the alternatives by September 12, 2016.

Making decisions about how to best provide high-quality recreation, while preserving the park for future generations, is a big responsibility. The planning process first involves scientists, technical experts and land managers, and the public in documenting and understanding the park's important natural, cultural and recreational resources, existing uses and visitor needs. After considering that information, Plan alternatives are developed that include resource preservation and land use strategies that will best serve California in the long term. An analysis of the potential environmental impacts of Plan implementation will be conducted as required by the California Environmental Quality Act. Finally, the preferred Plan will be presented to the California Park and Recreation Commission for review and adoption. This process is expected to be completed by the winter of 2017.

Kings Beach SRA is located along the north shore of Lake Tahoe within the community of Kings Beach, between Deer Street and Coon Street. The GP boundary encompasses about 14 acres and over 1,000 feet of the Lake Tahoe shoreline.

More information about the Plan, the public workshops and the schedule is available at www.parks.ca.gov/plankbsra.
