PROJECT TITLE: Boyes House Window Rehabilitation

LOCATION: Prairie Creek Redwoods State Park **COUNTY:** Humboldt

DESCRIPTION OF THE NATURE AND PURPOSE OF PROJECT: Remove 28 historic windows for rehabilitation, put temporary windows in place, and reinstall the historic windows in the Boyes House (residence 1) in Prairie Creek Redwoods State Park to keep water and cold air out of the residence. Work will remove the historic windows, number and catalog them, store them securely in the attic of the Boyes House, install new vinyl windows by placing them in the existing casing channel, weatherized, and secured with the original exterior trim boards. The temporary windows will be painted the same color as the outside trim. When the original wooden windows have been fully rehabilitated they will be reinstalled.

Careful attention will be given to preserving the integrity of all original components in order to retain the ability to return the windows to their original configuration once they are repaired. No alterations will be made to the original framing or surrounding trim.
