PROJECT TITLE: Bliss Water/Sewerplant Telemetry - D.L. Bliss State Park

LOCATION: D.L. Bliss State Park

COUNTY: El Dorado

DESCRIPTION OF THE NATURE AND PURPOSE OF PROJECT:

Install a communications line from the D.L. Bliss State Park Waterplant to the D.L. Bliss State Park sewage lift station. The communications line will send essential data from the sewage lift station to the waterplant office which will house the main supervisory control and data acquisition system which then sends information to the water and sewer plant supervisors office. Trench will be 150 feet long x 12 inches wide by up to 12 inches in depth between the waterplant and lift station. The communications line will be installed between six and twelve inches deep in the ground. All soil removed from the trench will be returned to the trench for backfill. No trees or bushes will be removed during this project. Project ensures continued use and maintenance and protects public health and safety. In the event that previously undocumented cultural resources are encountered during project construction (including but not limited to dark soil containing shellfish, bone, flaked stone, ground stone, or deposits of historic trash), work within the immediate vicinity of the find will be temporarily halted or diverted until a DPR-qualified cultural resource specialist has evaluated the find and implemented appropriate treatment and disposition of the artifact(s).
