Present Land Use/Zoning/General Plan Designation: Project area lies entirely within Clear Lake State Park. The park is zoned by Lake County as Resource Conservation. DPR retains approval authority for the proposed project, although Clear Lake State Park does not have a General Plan. Work to repair, replace, or rehabilitate existing facilities or to protect public health and safety are permitted under PRC § 5002.2(c). The project is also consistent with the DPR mission and its management directives aimed at creating opportunities for high-quality outdoor recreation.

Project Description: DPR proposes to repair or replace seven sewer lift stations in the sewage collection system at Clear Lake State Park. The sewer lift stations serve park facilities such as restrooms and showers, and remove sewage waste from the park. The following is a summary of project work.

- Replace sewage lift vaults, pumps, and electronic controls with new equipment.
• At the site of each lift station, install a new above-ground concrete pad and fiberglass cover to house above-ground piping and control panels.

- Replace and raise concrete pads and vault lids to avoid flooding during high water events.
- Replace electrical connections at the seven sewer lift sites. In addition, replace and upgrade approximately 2,090 total feet of electrical wiring.
- Install a new telemetry system to allow communication to occur between lift stations and the control panel at the park entrance station.
