Crime Prevention Through Environmental Design (CPTED)

Pre-Conference Workshop
Tuesday, April 21, 2020
9:00 a.m. to 4:00 p.m.
Early Bird Fee: $55 includes workshop, lunch, & transportation

Presenters:
• Brittain Storck, Principal, Alta Planning + Design
• Ryan Booth, Senior Designer, Alta Planning + Design

Description: Crime Prevention Through Environmental Design (CPTED) is a proactive technique to design and use the built environment so as to reduce crime and asocial behavior. Participants in the workshop will be introduced to CPTED principles specifically for trails, and corresponding public education, maintenance, and programmatic and operational measures that together can have positive impacts on trails and public space. Participants will learn how to perform a CPTED assessment in the classroom and then form small groups and travel to predetermined local park and trail sites to test their knowledge by completing a CPTED assessment in the field. Groups will return to the classroom before the end of the workshop to give presentations on their findings and recommendations. A workbook will be provided.

Itinerary:
9:00 am   Classroom session on CPTED topics at conference center
11:00 am  Field session overview/participants form small groups
11:30 am  Groups of participants carpool to field locations
12:00 pm  Boxed lunch in field
12:30 pm  Small group CPTED assessments in field
2:00 pm   Return to conference center/prepare for presentations
2:30 pm   Each group gives an informal presentation of their findings
3:30 pm   Conclusion/questions/discussion
4:00 pm   Workshop adjourns

Min and Max attendance: Minimum 15, max 20

Weather dependent: In the event of inclement weather, the workshop will be altered but will still take place.
**Educational Objectives:**
- Deep understanding of CPTED and, specifically, CPTED for parks and trails
- How the psychological design of space can influence user decisions
- How placemaking can be used as a crime prevention method
- Programmatic and operational strategies that use CPTED

**Presenter Bio**

**Brittain (Britt) Storck** has established her landscape architectural career around greenway and trail placemaking, natural resource-based recreation projects, and active community design and planning for 15 years. She co-chairs Alta’s National Trail Service Area, leads the firm’s east coast Landscape Architecture practice, and is a national expert on CPTED. Britt has worked collaboratively with engineers and planners, urban designers and in a volunteer capacity across the country to develop projects that activate communities and improve the quality of life. She has the CPTED Professional Designation credentials obtained through the National Institute of Crime Prevention training program. Individuals with this designation are qualified to identify strategies and concepts for projects that effect human behavior and influence a project’s real and perceived safety. CPTED experts perform field assessments and site plan reviews, write CPTED ordinances, author design guidelines, and provide overlay districts for planning and zoning.

**Ryan Booth** seeks to create projects of lasting social and environmental value through the design of compelling places. He has worked on an array of urban design and landscape architecture projects, widely ranging in scale and scope. His work in streetscape design, affordable housing, and civic engagement has allowed him to develop a diverse background. Ryan has also spent time serving with Bike & Build, planning and leading service-oriented bicycling trips to benefit affordable housing and empowering young adults for a lifetime of service and civic engagement.
