

BEFORE

“Thanks to the California State Parks Foundation Fire Resiliency Grant Program, California State Parks received a grant in the amount of \$8,500. With these funds we were able to reconstruct the pedestrian bridge that burned in the Blue Ridge Fire of 2020. This bridge is a key link between Horse Camp/Group Camp and the facilities at the park’s main campground and amphitheater. The bridge also allows access for visitors to travel from the day use area near the barn to horse camp and the wildflowers along Bane Ridge Trail.”
