

Chino Hills State Park

Volunteer Duty Statement

Native Habitat Restoration

Title: Native Habitat Restoration Volunteer

Purpose: Our purpose for this program is to restore park land by growing native plants in the park and using them in restoration projects at the park.

Duties: Volunteers will learn and/or teach others to identify plants, collect and process seed, plant it in various containers and care for the growing plants. Members also participate in planting plants at restoration sites, caring for them and monitoring sites while they are becoming established. Team members also assist with exotic pest plant removal projects and teach visitors and other volunteers about Chino Hills State Park vegetation communities and the park's restoration activities.

Reports to: Volunteer Coordinator and / or Environmental Scientist

Skills

Qualifications: Habitat Enhancement Team members are able to take a one mile hike up steep slopes while collecting seed. They are also able to lift and carry items weighing fifteen pounds, such as potted plants and soil amendments and/or work in pairs when lifting and carrying items heavier. Team members use gardening hand tools such as shovels, rakes and pruners in a safe manner. Volunteers must work well with others; this includes staff and volunteers.

Time Commitment: Two shifts or 8 hours per month

Benefits: Training on the natural and cultural history of the area, opportunity to make new friends while enriching and enhancing the experience of park visitors, and earn a District State Park Pass for over 100 hour per year or State Park Pass if over 200 hours per year and to have fun.

I have read the above job description, and I am willing to complete the necessary training and paperwork to be a Native Habitat Restoration Volunteer at Chino Hills State Park.
