Early Holiday Gift for Orange County Beach Goers

CALIFORNIA STATE PARKS, Orange Coast District.—Beachgoers and surfers have a new present to open this holiday season from California State Parks and Surfline/Wavetrak, Inc. Through the State Park “Proud Partnership” program, Surfline has installed cameras and upgraded live video feeds at several local surf breaks, including Bolsa Chica, Huntington Doheny, San Clemente, and Trestles State Beaches. The new equipment will provide the public with live and recorded video feeds of current surf and weather conditions on the website, www.surflin.com.

“The addition of cameras and improvement of the video feeds is great for our local state parks and fantastic for our visitors. From the comfort of their home, surfers and swimmers can observe up to date ocean conditions and make a decision on the best place for them to come out and recreate,” said Park Superintendent Brian Ketterer.

Surflin has been a strong supporter of State Parks and the State Junior Lifeguard Program through the years by offering scholarships to underserved communities, providing surf forecasts and important weather information to the professional lifeguard services, and promoting healthy ocean and beach initiatives. For this project, State Parks received advertising space on the Surfline website and an important donation to promote ocean safety within the San Diego and Orange County areas.

“It is an honor for Surfline to be named a Proud Partner. We believe that supporting the State Parks benefits everyone in the community. The partnership improves the experience for online visitors and enables us to provide resources which will assist in the park’s mission to serve the community,” said Surfline CEO Jonno Wells.

“State Parks has many wonderful partners that understand our mission, and we appreciate their support and contributions,” added Ketterer.
