Repairs to the Trail on the South Side of Lake Natoma at Folsom Lake SRA

FOLSOM – California State Parks will be making repairs to the paved trail on the south side of Lake Natoma between the Lake Natoma Crossing Bridge (Folsom Blvd) and the Young Wo Access. The trail will be closed to all traffic on this section of trail starting July 29, 2013 through July 30, 2013. The paved trail on the north side of Lake Natoma will be open as an alternate route for trail users. State Parks will post signs informing trail users of the closures.

A section of trail has lifted and will need to be repaired and repaved. The work is isolated to a small section of trail, however to provide for the safety of our trail users and work crews the short section of trail will be closed during the repair. The work is anticipated to take only two days.

“This is a heavily used section of trail enjoyed by pedestrians, cyclists and equestrians and we understand that this will be an inconvenience for many of our park visitors, said State Park Superintendent Richard Preston. We ask for the public’s cooperation in using an alternate route while we complete this repair, to provide for the safety for our visitors.”

If the public has questions about the trail repair project they can contact California State Parks at (916) 988-0205.
