NOTES .....	88

## INTRODUCTION

The central purpose of this edition of the annual statistical report is to provide information on the basic parameters of the California State Park System (State Park System) for a specific period of time; the 2013/14 fiscal year. This year spanned the period of July 1, 2013 through June 30, 2014. As indicated in Chapter 3, some of the data used to portray the State Park System for this fiscal year are current as of the beginning of the fiscal year, July 1. Some are current as of the last day of the fiscal year, June 30. Most of the State Park System data reflects the measurement of activity that took place between these two points in time, during the course of the entire fiscal year.

Like any responsible organization, the State Park System needs to clearly know the scope, scale and dimensions of its activities and operations. To have this knowledge, the State Park System needs information, as accurate as can be reasonably and economically obtained, on its assets, its activities and its products.

Collectively, this information will give a measure of the State Park System - what its various resources are, what it does with them, and what are the useful results of its activities. Such information will allow this organization to broadly view itself and the workings of the State Park System at a specific point in time and, when comparing this view with those taken at other points in time, will allow one to see and to perhaps analyze the changes that have occurred.

It is a convention that the official number of classified units and major unclassified properties that constitute the State Park System is established on the first day of each fiscal year, July 1, and does not change during that year. The few parks and properties that may in actuality be added to (or removed from) the System during the year will not be included in the official total until the first day of the following fiscal year.

Reflecting this convention, **the State Park System contained a total of 263 classified units and 17 major unclassified properties, for a total of 280 areas, during the 2013/14 fiscal year.**

For management purposes, these units and properties were grouped into districts, many of which further organized them into smaller groupings called sectors. The 25 districts and 67 sectors used in this publication reflect the organizational arrangement of the System's "field" on the last day of the fiscal year, June 30, 2014.

This statistical report will focus exclusively on information that is related to or reflects on the State Park System's "field" areas and activities, the system's 280 classified units and major unclassified properties. Specifically excluded from the data on the System's "field" activities and expenditures is the small number of the functions that serve the field and are situated in field locations outside of

headquarters, but are functions which are not associated with specific units or districts, or which are considered an extension of the headquarters' responsibilities. These functions include the two regional service centers (which provide unit-level planning and technical assistance), the three regional communication centers, and the statewide personnel training center at Pacific Grove. Also excluded are the Museum Collections Section and the Archaeological Lab and Collections.

The operation and management of the State Park System parklands and facilities requires approximately 65% of the effort and expenditure needed to operate California State Parks in which the State Park System is administratively located. The current percentage includes the "field" activities and expenditures noted above that serve the field and are situated in field locations outside of headquarters, but are functions which are not associated with specific units or districts, or which are considered an extension of the headquarters' responsibilities. Most of the remainder of the non-"field" costs excluded from this report are those for accomplishing the wide array of administrative and control functions that take place at the Sacramento, California headquarters. Also excluded are the costs of California State Parks' activities in managing those of its functions which are not at all related to the State Park System, mainly the administration of the state's many park and recreation grant programs, the provision of technical assistance services to local park and recreation agencies, and any expenses related to California State Parks' Office of Historic Preservation.

During the 2013/14 fiscal year, the State Park System was host to many tens of millions of visitors, cost hundreds of millions of dollars to manage and operate, employed over sixteen hundred permanent staff people, and generated tens of millions of dollars in fees and other revenues.

During the course of this fiscal year, the funds and staff allocated at the field level were applied to many critical objectives involving the protection and management of the State Park System's natural and cultural resources, as well as to the provision of high-quality resource-based outdoor recreation opportunities for park visitors. At the same time, staff provided the park visitors with a variety of direct services ranging from interpretive programs to public safety.

This report provides the end of the fiscal year's numerical information on many of the State Park System's most basic activities, revenues and expenditures, reflecting certain of the System's more measurable "inputs" and "outputs" for the collective 365-day period.

In general, this statistical report contains the most basic data for the 2013/14 fiscal year, as well as some analysis of this information. It also contains reference to important specialized System data that is not widely available, but which may be directly obtained from identified staff members.

Chapter 1 highlights the salient points found in the report's data for the 2013/14 fiscal year, data which is found in detail in Chapter 3, and makes some analysis of

this data's substance and significance. Where appropriate, comparisons may be made with similar data sets from earlier annual statistical reports or from other sources.

Chapter 2 briefly describes the size and organization of the State Park System as it existed at the end of the fiscal year, on June 30, 2014.

Chapter 3 is the core of this report, its multi-page table providing the selected statistical information on the 280 classified units and major unclassified properties that constituted the State Park System during the 2013/14 fiscal year. The data categories and their sequence on the table are arranged so as to provide maximum comparability with the layout of previous statistical reports.

Chapter 4 provides important information about the basic data that appears in the table in Chapter 3. This includes definitions of the data categories and the terms that are used. Where important, the data collection methodology is described. This chapter also provides information on the known limitations in the scope and accuracy of this data, and indicates the source(s) within California State Parks where this data originates.

Chapter 5 provides information about and access to a variety of system-related data which is beyond the necessarily limited scope of this statistical report. The State Park System creates a wide variety of other data and information, often specialized in nature and not widely known or available. This chapter provides references and citations which refer the reader to a variety of more specialized data on the State Park System's field activity, management and operations.

Chapter 6 provides information on the history of California State Parks' annual statistical report series and on its predecessor documents. It provides specific titles of documents containing basic data reaching back many decades.

Appendix A briefly refers the reader to the 2001/02 *Statistical Report*, which provided key data for the fiscal years from 1990/91 through 2000/01, when such reports were not prepared.

Appendix B provides information on the methodology and the results of the detailed inventory used to develop data on the State Park System's three basic types of public use facilities –overnight use (mainly camping), picnicking, and (non-motorized) trail mileage – used in this report. This survey also contains information on the capability of these facilities to accommodate visitors, of their “carrying capacity.”

Appendix C provides, as a matter of having a complete record of the State Park System's classified units, basic information for its 95 classified internal units, which are specialized units situated within the boundaries of certain other classified units. This appendix also identifies and provides limited data on a handful of small or minor properties which in 2013/14 were owned by California State Parks but which

were not associated with any of the State Park System's set of 280 classified parks and major unclassified properties.

Appendix D provides references to sources of statistical data and other information about the State Park System and to collections of written materials which exist both internal to and external to California State Parks. This information is very different from and does not duplicate the "Other Available Statistics" provided in Chapter 5 or the "Selected Data" referred to in Appendix A.

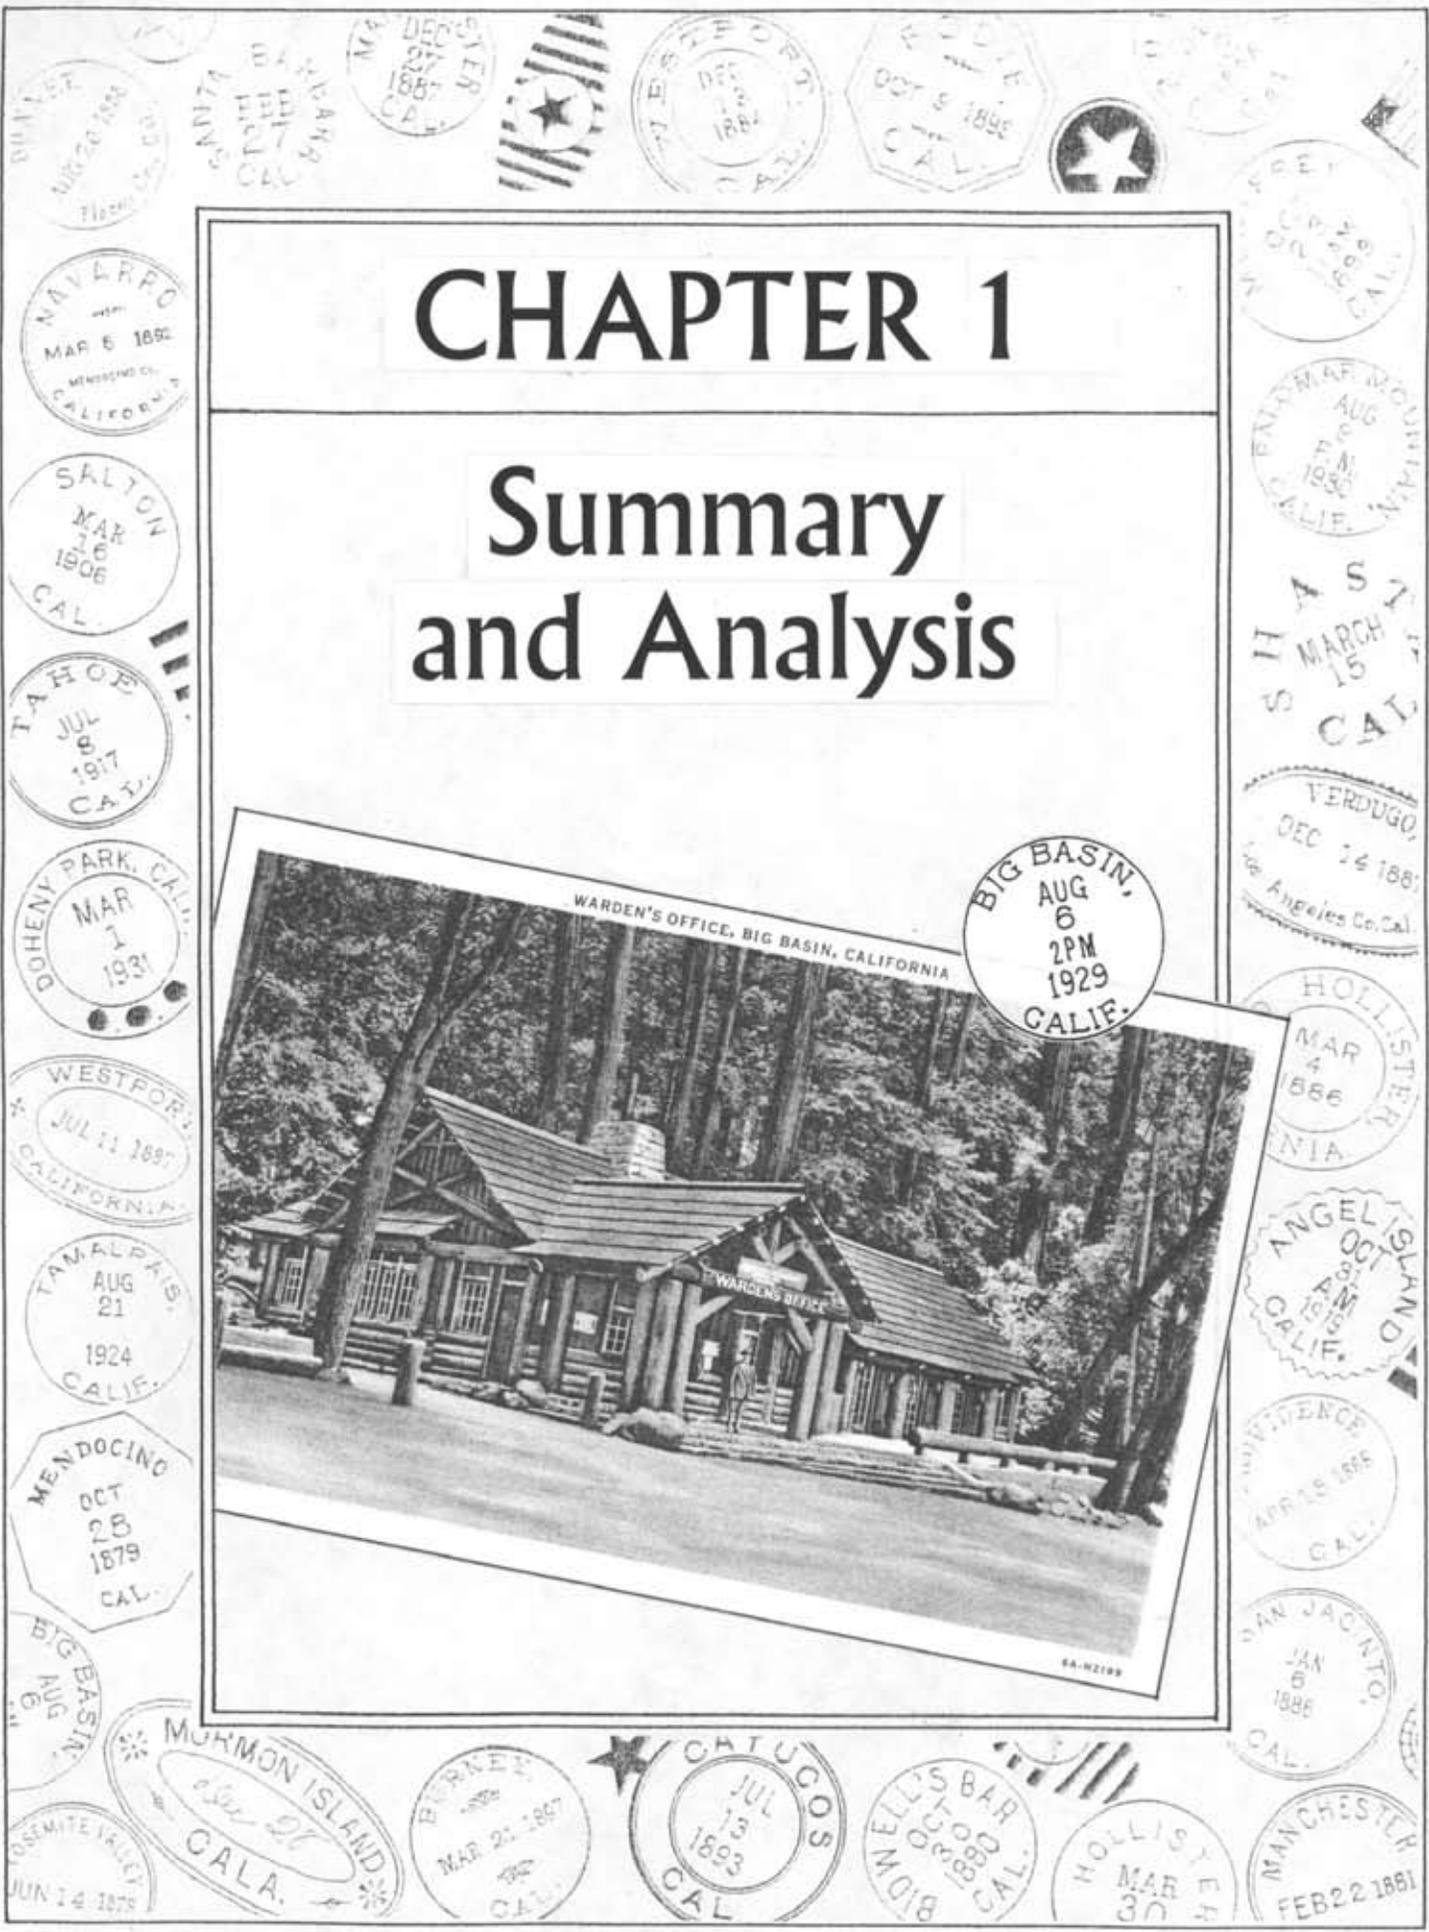

Appendix E displays the Unit Expenditure Detail Report which is an examination of the State Park System's budget for support expenditures. The costs for the State Park System fall into two main categories:

- Direct Costs (Operating Costs) - These costs include expenditures and encumbrances which directly benefit a park unit. Some examples are staffing and operating expenses.
- Indirect Costs - These costs include expenditures and encumbrances which indirectly benefit all park units. One example is the Department's administrative operation which benefits all park units. These costs are identified as Distributed Administration and Core Programs.

A new and revised edition of this statistical report will be produced following the close of each fiscal year. Readers' suggestions for additions and improvements to this regularly issued document may be made to California State Parks, Marketing and Business Development Division.

# CHAPTER 1

## Summary and Analysis

## CHAPTER 1 - SUMMARY AND ANALYSIS

The purpose of this statistical report is to provide selected data sets which portray the fundamental measures of California State Parks for the 2013/14 fiscal year. Collectively, this data shows the scope and scale of the State Park System, its activities and operations, and offers implications as to the benefits derived by its users. This large amount of data has been assembled in the extensive table that is the basis of Chapter 3.

The purpose of this chapter is to draw from the data found in Chapter 3 and to highlight its major findings. In many cases, data from this year's report will be compared with that from last year's report, revealing changes over time. Where possible, some commentary will be made on the data or its trends, bringing useful perspective to the information presented.

The ability to compare data through time will be limited due to the lack of detailed statistical information from the eleven years 1990/01 through 2000/01, during which time statistical reports were not prepared (see Appendix A).

This report's summary and analysis is limited to the system-wide totals of the various data sets. This statistical report's summary, with its commentary and analysis, follows. For definitions of the data categories, see Chapter 4.

\* \* \* \* \*

Number of Units and Properties - The total figure of basic classified units and major unclassified properties is 280.

Acreage, DPR-Owned - The total of 1,324,204.060 acres reflects an increase of approximately 0.02% (247.77 acres) over the previous year.

Acreage, Other - The total of 289,209.2204 acres shows an increase of approximately 6.30% (17,130.16 acres) from the previous fiscal year report.

Total Acreage - The State Park System's total acreage, a data category not reported in the table, is the total of the two previous figures. At 1,613,413.28 acres, this total reflects an increase of approximately 1.09% (17,377.92 acres) from the previous fiscal year. While the total acreage reflects a substantial acreage change from the previous fiscal year, these changes are due to several variables none of which includes a large recent acquisition.

Acreage changes occurred at:

Anza-Borrego Desert SP	+ 14,027.73
Millerton Lake SRA	+ 3,255.0
Ocotillo Wells SVRA	+ 95.27

(Prairie City) SVRA	+ 67.95
Morro Bay SP	+ 15.5
Chino Hills SP	+ 5.05
Pigeon Point Light Station SHP	+ 3.17
Old Town San Diego SHP	+ 2.47
Malibu Lagoon SB	+ 1.68
Old Sacramento SHP	+ 0.787
Columbia SHP	+ 0.42
El Presidio de Santa Barbara SHP	+ 0.115
Richardson Grove SP	+ 0.01
Montara SB	-0.05
MacKerricher SP	-5.55
Carnegie SVRA	-36.0

Waterfront Feet - The total of the four categories of waterfront footage is 8,937,052 (the equivalent of 1,692.62 miles), a 1.88% (164,593.77 linear feet (31.17 miles)) increase over the previous year. The waterfront length related to the shoreline of lakes and reservoirs (“L”) is 3,573,342 linear feet (or approximately 676.77 miles), a 4.55% (155,394 linear feet (29.43 miles)) increase over the previous year. The length of frontage on the Pacific Ocean and its major bays and estuaries (“O”) is 1,810,235 linear feet (the equivalent of 342.85 miles), a 0.28% (5,000 linear feet (0.95 miles)) increase. The length of river footage (“R”) is 1,732,865 linear feet (the equivalent of 328.19 miles), reflecting an increase of 0.24% (4,200 linear feet (0.80 miles)) from the previous year. The length of submerged footage (“S”) remained the same at 1,820,610 linear feet (the equivalent of 344.81 miles).

All waterfront feet reported reflects actual footage that is owned or managed by California State Parks. Some units within the system include waterfront footage that is operated by entities outside California State Parks. Furthermore, the reporting of waterfront can be misleading. These data are literal in that while a coastline would have one area of separation between water and land a river would have two, one for each bank of the river. If California State Parks owns or manages both sides of the river (such as a river that runs through parkland) then, for example, a 50 foot section of river would include 100 feet of waterfront feet. Rivers are natural features and therefore each bank of the river would include different waterfront footage data depending on factors such as river width, erosion, topography, etc. In the event that a river represents the border of California State Parks property, the waterfront footage would include the bank of the river owned or managed by the Department.

Individual Camp Sites - A total of 14,166 individual sites, as defined in Chapter 4 and determined by the survey described in Appendix B existed in the State Park System in the 2013/14 fiscal year. These data reflect a decrease of 270 individual camp sites from the previous year, a difference of 1.87%.

Because of the way individual camp sites (sometimes labeled as “family camp sites”) have been variously defined and counted over the last three decades, this figure cannot be usefully compared with any “information” earlier than fiscal year 2001/02. Over the last twenty years, estimates have run as high as 17,772 sites.

Group Camp Sites - A total of 353 such sites, as defined in Chapter 4 and determined by the survey described in Appendix B, existed in the State Park System in the 2013/14 fiscal year. This number reflects a decrease (2.49%) of nine sites.

Non-Camping Overnight Facilities - There were 707 such facilities, as defined in Chapter 4 and determined by the survey described in Appendix B, existing in the State Park System. The number of non-camping overnight facilities increased by one site from the previous year. These facilities were a range of accommodations which include rooms in commercial lodging, cabins and the use of space in hostels.

Individual Picnic Sites - A total of 7,369 such facilities, as defined in Chapter 4 and determined by the survey described in Appendix B, existed in the State Park System. This reflects a 0.74% decrease (55 sites) in individual picnic sites from the previous year.

Group Picnic Sites - A total of 259 facilities, as defined in Chapter 4 and determined by the survey described in Appendix B, existed in the System. This reflects a 2.37% increase (6 sites) in group picnic sites from the previous year.

Non-Motorized Trail Miles - A total of 4,754.38 miles, as defined in Chapter 4 and determined by the survey described in Appendix B, existed in the System. This is a 10.27% increase or 442.61 miles more than that reported in the previous year. This change is almost entirely the result of field unit respondents correcting their prior year’s data using more precise data collection techniques, not of changes in the actual number of trails. With the change in acreage to 16 park units (see above) during FY 2013/14, it is likely that trail mileage would be added to the system.

Motorized Trail Miles – A total of 579.25 miles, as defined in Chapter 4 and determined by the survey described in Appendix B, existed in the System. These data reflect an increase of 4.00 miles from the previous year, a difference of 0.70%.

Visitor Attendance – Day Use - The total of 68,736,536 day use visitors included both those who paid an admission fee and those who were admitted free. Almost three quarters (70.00%) of all day use visits are unpaid or free. This total figure reflected an increase of 7.38% over the previous fiscal year. Since the tabulation of visitor attendance includes many variables such as but not limited to methodology of collection and economic factors, any explanation of this increase would be speculative.

Visitor Attendance – Camping - This figure reached a total of 6,776,485 overnight uses, an increase of 6.14% over the previous fiscal year. Note that the camping attendance contains only some of the overnight use of the system that takes place in structures, as explained in Appendix B. This situation makes it impossible to make a valid correlation between the total of overnight public use facilities and overnight visitor attendance.

Visitor Attendance – Total - This figure reached 75,513,021 an increase of 7.27% over the previous fiscal year report.

It should be noted that the State Park System’s unit-level attendance figures, with few exceptions, are based on estimates rather than actual counts. In addition, the total attendance for the State Park System as a whole is believed to be substantially underestimated. The circumstances surrounding both of these factors are discussed as part of the definition of “visitor attendance”, found in Chapter 4.

Revenue - User Fees - The total of \$97,012,394 reflects a 11.36% increase over the previous fiscal year.

Revenue – Concessions - The total of \$18,406,117 reflects an increase of 14.65% over the previous year.

Revenue – Miscellaneous - The total of \$288,525 reflects an increase of 57.11% over the previous year. Historically, the Department’s reporting of miscellaneous revenue has fluctuated dramatically due to ever changing sources of revenue.

Total Revenue - The System’s total revenue of \$115,707,036, the sum of the above three categories, reflects an increase of 11.95% (\$12,355,335) from the prior fiscal year. The three revenue categories listed above, based on California State Parks’ “earnings”, constitute an important part of the State Park and Recreation Fund (SPRF).

Occasionally, districts will report a negative revenue figure. This does not necessarily mean that the district has lost revenue but is more likely a carryover debit from the previous year or a cost associated with an individual unit reported at the district level.

Operating Costs: The total expenditures for field operations was a total of \$270,757,642. Since the Department changed methodologies for what is included in operating costs, any comparison to the previous year is not possible.

Prior to the 2013/14 fiscal year, operating costs were reported at the district and sector level. Since revenue has historically been reported at the unit level, the comparison of operating costs to revenue has been impossible at the unit level. Now that operating costs are reported at the unit level, this comparison provides useful data previously unavailable.

Revenue as a % of Operating Costs - In the 2013/14 fiscal year, the total revenue was 42.73% of the field operating costs for the System as a whole, a 6.92% increase over the previous year. This methodological change occurred in the 2012/13 fiscal year.

Authorized Permanent Full-Time Positions - The total of 1,685.0 positions for the 2013/14 fiscal year reflected an increase of 0.30% (5 positions) over the previous year.

Authorized Temporary Positions (ATP) - In terms of person-year (PY) equivalents, a total of 1,218.7 positions reflected a decrease of 14.30% over the previous fiscal year.

## CHAPTER 2 - PARK SYSTEM SIZE AND SCOPE

The State Park System consisted of 280 properties during the entire 2013/14 fiscal year. Of these, 263 were units that have been classified. The other 17 were major unclassified properties for which classification as distinct new units could be anticipated at some future date. All of these specific units and properties are identified by name on Lists 1 and 2 of the July 1, 2013 edition of the publication *Planning Milestones for the Park Units and Major Properties of the California State Park System*. The number and distribution of these properties, by classification, is as follows:

State Park (SP)	88
State Beach (SB)	62
State Historic Park (SHP)	52
State Recreation Area (SRA)	33
State Natural Reserve (SNR)	16
State Vehicular Recreation Area (SVRA)	8
State Historical Monument (SHM)	1
State Marine Park (SMP)	1
State Seashore (SS)	1
Wayside Campground (WC)	1
State Cultural Reserve	0
Underwater Recreation Area	<u>0</u>
Classified Units	263
Major Unclassified Properties	<u>17</u>
<b>Total – State Park System</b>	<b>280</b>

The California Resources Code, Sections 5019.50 *et seq*, describes and characterizes each of the twelve classifications listed above. The code indicates in general terms the types of features and general qualities inherent in a unit that is given a particular classification, and also provides guidance as to the sort of management to be accorded to such a unit.

State Vehicular Recreation Areas are technically part of the State Vehicular Recreation and Trails System which, by legislation, is organizationally separate from the State Park System. For this reason, much of the data for the two systems are collected separately. The data for the two systems, however, is brought together for the purposes of this statistical report.

Located within and being an integral part of many of the State Park System's 263 units with the classifications indicated above, there were an additional 95 units which were identified by three other classifications. These other classifications call

for enhanced, specialized protection and management for the noteworthy features or qualities found in the unit in question. Commonly termed “internal units”, and found on List 3 of the *Planning Milestones* publication cited above, the number and distribution of these units, by classification, is as follows:

Natural Preserve (NP)	61
Cultural Preserve (CP)	22
State Wilderness (SW)	<u>12</u>
Total – Internal Units	95

The State Wilderness units, in addition to being part of the State Park System, are also part of a larger California Wilderness Preservation System, as defined in Public Resources Code Section 5093.3.

In addition to the lands noted above, which constitute the official State Park System, California State Parks owns a number of small or minor properties that are not related to any of the System’s classified units or major unclassified properties. Information on these minor State Park System properties appears in Table C-2, in Appendix C.

The State Park System’s 280 classified units and major unclassified properties are administered through districts, groupings based largely on their geographic proximity. Larger districts are often subdivided for management purposes into smaller areas called sectors. During the 2013/14 fiscal year, the units and properties of the State Park System were administered through 25 districts. These districts contained, collectively, a total of 67 sectors.

It is important to note the manner in which any change in the size or composition of the State Park System is officially determined; a matter alluded to in this report’s Introduction. Because the California State Park and Recreation Commission may name and classify property at its meetings, and new properties may come into system ownership during the year, the size of the State Park System may change over the course of a fiscal year. To transform this natural periodic fluctuation to an administratively useful once-a-year change, California State Parks has adopted a convention which deems the State Park System to have a single size and composition, unchanging over the course of an entire fiscal year.

By this convention, the official size and composition of the State Park System is changed only once a year, on each July 1. To accomplish this, the changes that have been made during a year, as well as candidates for changes still needed to be made in updating the State Park System’s official list of units and properties, are all identified in late June.

These changes can include the addition, removal or combining of specific units or properties. They can include changes of unit or property names, and changes in

unit classifications. Such changes, either already accomplished or proposed, are discussed in late June of each year by California State Parks' Planning Policy and Programming Committee. Its recommendations for desirable changes are submitted near the end of the fiscal year to the Director of California State Parks for approval. Those changes which are approved by the Director in late June become official on July 1. These changes modify the existing set of State Park System units and properties and the new official set for the next fiscal year appears in that year's July 1 edition of California State Parks' annual *Planning Milestones* publication.

Changes in the State Park System's set of districts, their boundaries or names, are the result of administrative decisions, proposals for which are approved by the Deputy Director of Park Operations and the Director of California State Parks. Such changes may be made at any point in the fiscal year. The same is true for changes made in the boundaries of the sectors within districts. The districts and sectors reported in this statistical report are those that were in place on June 30, 2014, at the end of the 2013/14 fiscal year.

## CHAPTER 3 - BASIC PARK SYSTEM STATISTICS

The following set of pages presents a single table which contains data providing the basic statistics which measure selected aspects of the scale, activity and operation of the California State Park System during the 2013/14 fiscal year.

In this table, the individual districts of the basic State Park System, as they existed at the end of the fiscal year, are presented alphabetically and, within each district, its sectors are arranged alphabetically. When classified units and major unclassified properties are managed out of a district office, that district office is - for the purpose of this report only - considered a *de facto* sector. Within each sector, the classified units and major unclassified properties are listed alphabetically. Internal classified units do not appear in this table, to avoid the double counting that would result from including their statistics along with those for the unit in which they are situated. Basic information on internal classified units appears in Appendix C.

The table has three parts that are joined sequentially. The first part provides information for each district. The second provides the totals for each of the districts. The last part combines the totals for all 25 districts, giving the total for the State Park System as a whole. To this total is added the information for minor system properties which, when combined, give the grand total for all of the properties of California State Parks.

In addition, totals are provided for acreage, public use facilities and visitor attendance are amalgamated by unit classification (e.g., State Park, State Historic Park, etc.).

For each entry, the names of the classified units are followed immediately by their classifications, in abbreviated form. The names of the major unclassified projects appear as names only, without being otherwise indicated by a word like "project" or "property" unless that designation has been officially added to the name of the project or property.

Forty-nine units and properties in the State Park System are operated not by the state but instead by local government park agencies (see July 1, 2013 *Planning Milestones* List 10) or by non-profit organizations, acting through individual operating agreements with California State Parks. Forty-five of these units meet the criteria to be included in this publication, i.e., classified units and major unclassified properties. The names of these units and properties appear in italics. Their acreage data is included in the State Park System's subtotals and totals, but in many cases there is no available information on their other characteristics such as visitor attendance and operation costs.

There are certain units and properties which are operated by the State Park System where no attendance is reported. These are usually small, isolated, little developed and little-visited units where counting visitors or collecting entrance fees would not justify the costs of doing so.

Most of the data in the table is available and reported on the basis of the individual unit or property. However, in cases of data on such topics as staffing, the reported data is of the allocations of these resources made by headquarters to the district. This allows the district to be flexible in allocating (and reallocating) its funds to its sectors and individual units in the course of the year. Therefore, there are no unit-level allocations shown in these categories. Also, in the case of revenues, some of these monies come not into individual units but instead into the district or sector offices; these are recorded as district or sector income rather than unit income.

Some of the categories of information in this chapter's table, which appear as column headings, contain data which is current as of either the beginning or the end of the fiscal year. The remainder of the data categories reflects activity which occurs during the course of the fiscal year, between the first and last day.

Categories with data which are current as of the first day of the fiscal year, July 1, 2013 are those which define the State Park System for the entire fiscal year (2013/14). This information corresponds exactly with the classified units and major unclassified properties (Lists 1 and 2) of the publication *Planning Milestones for the Park Units and Major Unclassified Properties of the California State Park System* which is dated July 1, 2013. These categories are:

- Unit name and classification, or name of the major unclassified property
- Unit number
- County or counties in which the unit or property is located

The following categories of information in the table show what is valid or in place as of the last day of the fiscal year, June 30, 2014. These categories are:

- District name
- Sector name
- Acreage - state owned
- Acreage - other
- Waterfront feet – separated into lake (“L”), ocean (“O”), river (“R”) and submerged (“S”).
- Public use facilities - individual camp sites
- Public use facilities - group camp sites
- Public use facilities - non-camping overnight facilities per individual unit (e.g. rooms, cabins, yurts, etc.)
- Public use facilities - individual picnic sites
- Public use facilities - group picnic sites

- Public use facilities - non-motorized trail miles

The last categories of information indicate activity undertaken, revenue generated, or resources expended over the 365-day course of the year, from July 1 through June 30. These categories are:

- Visitor attendance - day use
- Visitor attendance - camping
- Revenue - user fees
- Revenue - concessions
- Revenue – miscellaneous
- Revenue - total
- Operating costs
- Revenue as a percent of operating costs
- Authorized staffing levels - permanent full-time
- Authorized staffing levels - temporary, in PY (person-year) equivalents

Definitions of these data categories may be found in Chapter 4.

Two symbols which appear in the table, defined as follows, are used so as to leave no space or cell empty.

- A zero (“0”) is put in a space where there could be a number, indicating that the actual number is zero.
- A dash (“-”) is put in a space where the appropriate information does not exist or is unavailable, either because it is not collected (e.g. attendance of small or remote units) or because it is not computed for record-keeping purposes (e.g. the unit allocation of a lump-sum amount of district funding).

Revenue totals by classification when compared to systemwide will differ because of District and Sector headquarters data not included in classification data (\$277,498 in user fees, \$841,739 in concessions and \$243,123 in miscellaneous).

Comment Key	Comments from District, Sector and Unit data.
1	Revenue data for the California Indian Heritage Center Sector reported in source document as the Historic Sites Sector/Rec.
2	Revenue data for the Stanford Mansion Sector reported in source document as the Leland Stanford Mansion Sect Ofc/Rec.
3	Turlock Lake SRA authorized staffing levels reported in Governor's Budget as Turlock Lake Sector.
4	Palomar Mountain SP and Picacho SRA authorized staffing levels reported in Governor's Budget as Palomar Sector and Picacho Sector respectively.
5	Acreage and waterfront data for Albany SMR and Emeryville Crescent SMR are currently included in the McLaughlin Eastshore State Park (SS) data.
6	Mammoth Bar OHV Area is managed with a distributed area approach with motorized travel not restricted to identified routes.
7	Operating costs data for the Multi-Agency Facility (\$226,574) included in the Monterey District data.
8	Revenue data for the Lake Oroville Sector office includes the Lake Oroville Visitor Center.
9	Oceano Dunes Sector authorized staffing levels included in Oceano Dunes District data.
10	Oceano Dunes SVRA is managed with a distributed area approach with motorized travel not restricted to identified routes.
11	Heber Dunes SVRA is managed with a distributed area approach with motorized travel not restricted to identified routes.
12	Tijuana Estuary Natural Preserve revenue reported separately in source document from parent unit Border Field SP. Tijuana Estuary NP data included in Border Field SP data.
13	Año Nuevo Natural Preserve revenue reported separately in source document from parent unit Año Nuevo SP. Año Nuevo NP data included in Año Nuevo SP data.
14	Attendance for the Mojave Desert Info Center reported in Mojave Sector data.
15	Providence Mountains SRA has been closed since 2011 due to major infrastructure issues.
16	Clay Pit and (Prairie City) SVRAs are managed with a distributed area approach with motorized travel not restricted to identified trails.

# CHAPTER 4

## Basic Statistics- Definition of Terms

## CHAPTER 4 - BASIC STATISTICS – DEFINITION OF TERMS

This chapter provides definitions or characterizations of each of this report's data categories, along with how their information is created and processed within California State Parks. Where appropriate, background information on certain data categories is provided to allow the reader to know something of what is behind the data and to understand the strengths and weaknesses of the numbers that are available for use. These definitions appear below.

\* \* \* \* \*

Park Name – With rare exception, classified units are named by the California State Park and Recreation Commission, based on recommendations made by the Director. Very few units have been named by the California Legislature. The unit's name usually reflects a geographic feature or an individual or group of people historically associated with the unit. Prior to their classification, newly acquired properties are given temporary names for working purposes. Information source: California State Park and Recreation Commission; Acquisition and Real Property Services Division, California State Parks.

Park Classification - With rare exception, units are classified by the California State Park and Recreation Commission, based on recommendations made by the Director. Very few units have been classified by the California Legislature. These recommendations are based on the options found in Public Resources Code Section 5019 *et seq.* Each unit is given a classification that best reflects the unit's primary values and the purposes for which the property was acquired and is to be managed. Information source: California State Park and Recreation Commission

Unit Number - The "unit number" is the last three digits of a unique six-digit number assigned by the Accounting Services Section to each of the classified units and major unclassified properties of the State Park System. Such six-digit numbers are also assigned to California State Parks' various other organizational components - divisions, sections, and offices. A major purpose of these numbers is to identify and track money, staff and other resources allocated to and used by these various activity centers. Information source: Accounting Services Section, California State Parks.

County - This shows the county or counties in which the unit or property is located. The abbreviations for the county names conform to the standard used throughout California state government. Information source: Acquisition and Real Property Services Division, California State Parks.

Acreage- This is the surface acreage of the lands and waters which constitute each classified unit and major unclassified property. This information is based on county assessor's maps, descriptions, and any notations regarding easements or claims on these properties. The acreage of the lands in the California State Park

System is also recorded, on a parcel-by-parcel basis, in the assessor's books of the counties where the lands are situated.

The addition or removal of acreage from the State Park System's database is a continuous process. In any instance, it is accomplished at the time that the appropriate records are received and processed by California State Parks. This may not coincide with the time of the recording of deeds, payment of funds, or movement of other paperwork. Information source: Acquisition and Real Property Services Division, California State Parks.

- DPR-Owned – those lands which are owned in fee by California State Parks. Some of these lands, however, may be subject to easements and certain other restrictions.
- Other – those lands which are owned in fee by another government agency, non-profit organization or private entity, but which are operated as part of the State Park System through an agreement with California State Parks. The form of these agreements includes leases, permits, easements, operating agreements and memorandums of understanding.

Waterfront Feet - Water, in the form of lakes, rivers and ocean shoreline is an important park feature, from both an environmental and recreational standpoint. Data on the presence and magnitude of this feature is measured in terms of its frontage, the edge it presents to or within the unit or property. The four types of waterfront feet are reported separately - for natural lakes and reservoirs ("L"), for rivers ("R"), for the shore of the Pacific Ocean and its major estuaries ("O") and for waterfront feet along the Pacific Ocean that are submerged ("S"). The data in this column is presented in actual footage. Information source: Acquisition and Real Property Services Division, California State Parks.

All waterfront feet reported reflects actual footage that is owned or managed by California State Parks. Some units within the system include waterfront footage that is operated by entities outside California State Parks. Furthermore, the reporting of waterfront can be misleading. These data are literal in that while a coastline would have one area of separation between water and land and river would have two, one for each bank of the river. If California State Parks owns or manages both sides of the river (such as a river that runs through parkland) then, for example, a 50 foot section of river would include 100 feet of waterfront feet. Rivers are natural features and therefore each bank of the river would include different waterfront footage data depending on factors such as river width, erosion, topography, etc. In the event that a river represents the border of California State Parks property, the waterfront footage would include the bank of the river owned or managed by the Department.

Public Use Facilities - The properties of the State Park System provide a wide range of public use facilities, including picnic sites, camp sites, overnight shelters, trails, boat launching ramps, restrooms, roads, parking areas,

interpretive centers and campfire centers. The three most common general types of public use facilities are those used by visitors for overnight use, for picnicking and for moving about the park on trails, by means of foot, horse or bicycle.

Earlier statistical reports were inconsistent in their definitions of these three types of facilities. Such reports did not have data on certain subcategories of facilities; in the case of overnight use facilities, group camps were seldom reported and data on structural overnight facilities had never been collected. Commencing with the 2001/02 *Statistical Report*, data for public use facilities of those used by visitors for overnight use, for picnicking and for moving about the park on trails, by means of foot, horse or bicycle have been specifically included. To obtain the current and detailed data that was needed for this report, a special unit-by-unit web survey was accomplished in the fall of 2014, seeking information that was current as of June 30, 2014. The details of this survey are contained in Appendix B. Information source: Marketing and Business Development Division, California State Parks.

- Individual/Family Camp Sites - This category is the sum of eight survey subcategories. Each subcategory is briefly described here and fully described in Appendix B.
  1. Primitive/Undeveloped – each site accommodates up to eight people and two vehicles; tent space, stove, table and nearby piped water, chemical or vault toilet. Some of these amenities may not be available in every case.
  2. Developed (standard) – each site accommodates up to eight people and two vehicles; designated parking, tent or RV space, stove, table and nearby piped water, and restroom with flush toilets and hot water; may include showers and laundry sinks. This site can accommodate recreation vehicles that are less than 30 feet in length.
  3. Developed (oversized) – each site accommodates up to eight people and two vehicles; designated parking, tent or RV space, stove, table and nearby piped water, and restroom with flush toilets and hot water; may include showers and laundry sinks. This site can accommodate recreation vehicles that are over 30 feet in length.
  4. RV Hookup – each site accommodates up eight people and two vehicles in a designated space and provides paved spur for RV, as well as hookups for electricity, water and sewage disposal.
  5. Environmental/Trail – a designated primitive site in a relatively undisturbed setting, accessible by foot path or trail.
  6. Hike/Bike – a designated area with tent space, table, fire rings or stove with water and toilet facilities nearby, accessible by foot path or trail.
  7. Floating Campsites – tent space, table, stove, and toilet facilities on a floating platform, accessible only by boat.

8. Dock Berths, Offshore Mooring Buoys – a place to tie up a boat, which itself may serve for overnight use; some units with mooring buoys have an assigned campsite on land.
- Group Camp Sites – This category is the sum of two subcategories. Each subcategory is briefly described here and fully described in Appendix B.
    1. Tent or RV Use - primitive or developed – an area with space for many tents or RVs, providing many tables, stoves, water sources, and restrooms, designed to be used by a large group of people; often available by reservation only.
    2. Horse camps – primitive or developed – as above, but with added facilities needed for the management of horses.
  - Non-Camping Overnight Facilities - This includes tent cabins, rustic cabins, shelters, yurts and bark houses, as well as lodges, motel facilities, hostel facilities, and modern cabins.
  - Individual or Family Picnic Sites – These are small areas with tables, stoves or fire rings, with nearby parking, water and restrooms. These sites are sometimes used by groups but are intended mainly for individuals or families.
  - Group Picnic Sites - These are large areas with a number of tables, stoves or fire rings, with nearby parking, water and restroom facilities, often used by reservation only.
  - Non-Motorized Trails – This category is the sum of five subcategories. Each subcategory is briefly described here and fully described in Appendix B.
    1. Multiple Use Trails - these facilities are unpaved pathways or trails for use by all three types of users: pedestrian, horse and bicycle.
    2. Equestrian/Pedestrian - this category includes pathways or trails designated for equestrians and pedestrians thereby excluding bicycles.
    3. Bicycle/Pedestrian - this category includes pathways or trails designated for bicycles and pedestrians thereby excluding horses.
    4. Pedestrian only - this category includes pathways or trails designated for pedestrians only thereby excluding horses and bicycles.
    5. Primitive/Administrative Roads Used as Trails – this category includes unimproved (dirt or gravel) service roads and fire roads which are designated for trail use.
  - Motorized Trails – These data include trails within the State Parks System that motorized vehicles are allowed to use. While most of these trails can be found in State Vehicular Recreation Areas, there are some motorized trails located in other classified units. Not all units that allow motorized vehicle use inventory their trails by calculating the number of trail miles. Because the landscape of some of these units are so open individual trails are not

practical. At these units motorized vehicular use is reported by area and not miles of trails.

Note that the State Park System Marketing and Business Development Division's survey of public use facilities provided certain figures that were different from those which had been developed in recent years. The data developed by the Marketing and Business Development Division's survey will be considered to be correct and official.

Visitor Attendance - Data on visitor attendance reflects an estimate of the number of individual visits (not the number of individual visitors) to the units of the State Park System during the fiscal year. Using this approach, an individual visiting three units in a day is recorded in the attendance data three times rather than one.

Attendance data is collected at the unit level, sent to the district offices, and thereafter conveyed to the Field Services Division in headquarters. Some units or districts may collect a variety of more detailed attendance or visitor use data (e.g. attendance at a specific area or facility, like a boat launching ramp), but only the unit-wide data on three required categories – free day use, paid day use, overnight use - are conveyed to headquarters to be used for system-wide records. Source: Park Operations, California State Parks.

The two different categories of visitor attendance reported in this statistical report are generated in different ways, and their consistency and accuracy differ widely.

- Day Use – This is the number of day (non-overnight) visits to the unit in question. “Day use”, as used in this column, includes both free day use and day use for which a fee is paid for entry into the park. Day use includes park entry by any means, by motor vehicle of any type, on foot, on bicycle, by boat or on horseback. A single visit is counted regardless of the length of stay or variety of activities undertaken. Historically, approximately 30% of day use is paid and the remainder is free. Day use admission based on the use of annual passes is included in this data.
- Camping - This is the number of overnight visits to the unit in question by visitors using the many types of sites and structures listed above, as well as using temporary overflow areas.

Not all units collect visitor attendance information for day use and overnight use in the same way. In a few instances, usually historic units with per-person admission charges, there are actual counts of visits. In most units, however, attendance figures are the result of making estimates, using various techniques and producing results of widely different levels of accuracy. The estimation techniques may range in quality from one unit to the next and they may be changed at any unit at any time. While the accuracy of these figures has

substantial limitations, it is believed that in the aggregate, over time, orders-of-magnitude and broad trends in visitor use can be determined with some validity.

It is clear that, for the entire State Park System, total attendance is underestimated for three reasons.

1. Little or no data is collected from State Park System-operated units which are small, remote and little used, where gathering this information would not be cost-effective;
2. Data is rarely collected from units which, in large part or in their entirety, are managed not by the State Park System but by another agency or organization through an operating agreement. Many of these units are heavily used ocean beach units with substantial attendance.
3. The failure to report all of the visitors who spend the night in a unit not through traditional camping but instead through the occupancy of such structures as lodges, cabins, yurts, and hostels.

Revenue – The *Statistical Report* depicts revenue earned at the field level at the Park Unit, Sector, or District as a result of parklands and facilities being used by visitors or organizations for a wide range of approved purposes. Accountability for field level revenue is generated at the park unit or above and is reported to the Accounting Section and subsequently to the Budget Section in Headquarters.

The revenue figures in this report represent fiscal year-end totals as of June 30<sup>th</sup> and are a subset of the total revenues reported in the “Fund Condition” of the Governor’s Budget. Revenue totals shown in the Governor’s Budget reflect the combined total of the 25 State Park System Districts plus any revenue earned at the Headquarters level. The following four of the six revenue categories reported by the State’s accounting system (CALSTARS) are reported as “field revenue” in the *Statistical Report*.

User Fees – Includes vehicle day use, per person entry fees, tours, camping and the use of park facilities for other purposes such as boat use, pay showers and special events. This revenue source is represented by CALSTARS category 140600, State Beach and Park Service Fees.

Concessions – This category represents the use of property by other entities including rental income from concessionaires who may contract with the department to provide goods and services to park visitors on State Park lands. This category also includes the lease of park system lands, or dwellings. This revenue category is reported in CALSTARS category 152300, Miscellaneous Revenues from Use of Property & Money.

Miscellaneous – This revenue category combines several CALSTARS categories including 161400, Miscellaneous Revenue that captures

revenue from miscellaneous sources such as state park publications, the sale of merchandize, sales of firewood and others; 150300 captures revenue generated from interest on revenue; 164200, captures revenue earned from Parking Violations as well as a few other small categories of income.

The OHMVR Division receives revenue from other sources including the sale of OHV licenses (“green stickers”), as well as other sources that are not captured in the field level data for the *Statistical Report*.

Revenue earned by or funds transferred to the State Park System at the headquarters level is not reported in this statistical report.

Operating Costs - These are funds from California State Parks’ annual budget which provide for the operation and management of the “field” portion of the State Park System, as described in the Introduction to this report. These monies fund the staff, equipment, utilities and supplies needed to serve the visiting public, to maintain and renovate facilities, and to protect and manage the System’s natural and cultural resource base. The operating costs reported in this statistical report are a subset of the total expenditures reported each year in the “Actual” column in the Governor’s Budget. Information Source: Budget Section, California State Parks. See Appendix E for the Unit Expenditure Detail Report for Total Department Costs by Park Unit. That report not only includes the operating costs (which are displayed in the Total Direct Costs column) but also includes Total Indirect Costs which are those costs for Administration and Core Programs that indirectly benefit all parks. Information Source: Budget Section, California State Parks.

Revenue as % of Operating Costs - A computation made to indicate in a rough way the degree to which the State Park System as a whole or any of its districts are “self-supporting”, a point where revenue equals or exceeds operating costs. The district figure ranges widely, depending largely on the revenue-generating capability of the units and properties within a district. Also important in determining the size of this figure is the degree to which the operation of the district’s set of units is particularly labor-intensive and whether the district’s units and properties are located close to one another or are widely distributed. Source: Marketing and Business Development Division, California State Parks computations.

Staffing - The operation and management of the units and properties of the State Park System, as well as the district and sector offices, requires a large and diverse professional staff. The two staffing categories of concern here are permanent full-time staff (indicated as the number of positions) and temporary staff (measured in terms of person-year equivalents). Information on the annual quantity of what might be deemed another type of staffing, that of non-paid volunteer work, is available from the Interpretation and Education Division.

The data provided in this report is for positions that were authorized rather than those that were actually filled during the fiscal year. These figures are reported annually in the *Governor's Budget*. Information source: Budget Section, California State Parks.

- Permanent, full time – These are individuals who have permanent civil service status in a wide range of job classifications. They work year-around for the standard 2,080 hours per year.
- Temporary/PY equivalent – “Temporary” includes permanent intermittent, seasonal and retired annuitant positions. Many of these employees are normally required during the parks’ busy season, when visitor use is heaviest. Prior to FY2010/11, the authorized temporary position data were calculated by taking the prior year figures and making any adjustments. This methodology was changed for the FY2011-12 authorized temporary position data. The current methodology uses the actual number of authorized temporary position hours worked and divided by the full-time equivalent of 1,778.5 hours.

## CHAPTER 5 - OTHER AVAILABLE STATISTICS

In addition to the basic statistics or data sets shown in the table in Chapter 3, the State Park System regularly collects a wide variety of other useful information which records and measures many of its activities and operations. Some of this information is portrayed in descriptive or graphic terms as well as in numerical form. Certain material is available through California State Parks' Internet and Intranet sites, with a wider range being available directly from specific sources within California State Parks.

### A. Internet/Intranet

Two general sources of information about California State Parks and the State Park System are the State Parks' Internet web site and its Intranet site. These sites contain useful information about California State Parks and the State Park System. They contain information about the individual park units and their attractions, and about a variety of special topics of current relevance to the State Park System. Also available is information about California State Parks' organizational components and some of the work which they do. These latter references make available the contents of a variety of reports, studies and data sets, as well as general information about California State Parks and its State Park System. Most of the contents of the Internet and Intranet are expanded and updated on a periodic basis.

The Internet site is available to the general public at <http://www.parks.ca.gov>. The Intranet is available only for those with access to California State Parks' internal communication system, and is found at <http://isearch.parks.ca.gov>.

### B. Direct Sources

A wide variety of specialized data and information can be obtained directly from the organizational units of California State Parks that produce it.

In the following listing, selected areas or topics of information are specified and very briefly described. In the case of each item, California State Parks' organizational source or location of the information is indicated, in terms of the appropriate division, office, section or unit. In addition, a specific resource person is indicated, along with their phone number and email address. These organizational and personal references are current as of the time of this writing but are subject to change over time.

Most of the information referred to below may be made available upon request. Some of it may be available immediately in hard copy, while much of it exists only in a computer database which can be accessed only by the program

manager. In many cases, the level and format of the data can be tailored to the specific needs of the individual making the request.

These more specialized areas of information and their organizational sources are as follows.

Accidents - Included here is information from the field on calls for assistance, reports taken and filed, and actions taken as a matter of public safety. Assistance may include first aid, getting needed help, search-and-rescue efforts and finding lost individuals. Incidents involving motor vehicles and boats are reported separately in two different categories.

- Contact: Law Enforcement & Emergency Services Division, California State Parks, Sacramento (916) 653-0388.

Aerial Photo Files - Aerial photographs provide important information on land use and conditions in and around State Park System lands. Aerial photographs are routinely purchased by California State Parks for many planning and management purposes. The primary repository and catalogue system for 9"x9" color, infrared, and black and white aerial prints are maintained by the Natural Resources Division in Sacramento.

- Contact: James Suero, Forester, Natural Resources Division, California State Parks, Sacramento (916) 651-6941; [james.suero@parks.ca.gov](mailto:james.suero@parks.ca.gov).

Archaeological Collections - Historic and prehistoric collections organized by park unit and site are curated at the Archaeological Collections Research Facility which includes all of the notes, records and photos related to the collections and the fieldwork that generated them. They are managed by the Archaeology History Museums Division using The Museum System (TMS) database.

- Contact Richard Fitzgerald, Museum Collection Center, Archaeology, History & Museums Division, California State Parks, Sacramento (McClellan Park) (916) 263-0794; [richard.fitzgerald@parks.ca.gov](mailto:richard.fitzgerald@parks.ca.gov).

Condition Assessment Database - In 2002, California State Parks conducted an extensive system-wide survey of natural resources in the State Park System to establish a baseline on the general condition of park lands and detailed information on selected natural resource features. Information on such things as rare and endangered species, non-native plants and animals, natural habitats, geologic features and pollution, was collected from park resource specialists and entered into a database. Information on over 195 of the System's park units is included in the database.

- Contact: Art Fong Jr., Natural Resources Division, California State Parks, Sacramento (916) 653-9454; [arthur.fong@parks.ca.gov](mailto:arthur.fong@parks.ca.gov).

Cooperating Associations - This database contains information on the formal independent nonprofit citizens' groups which contract with one or more park units to assist in the funding of those units' interpretive and educational programs and

services. Information is available on the identity of each association, its name, address, phone number(s) and email address. Financial information, as reported by the associations, is also available.

- Contact: Wayne Breece, Partnership Support, Interpretation and Education Division, California State Parks, Sacramento (916) 654-5397; [wayne.breece@parks.ca.gov](mailto:wayne.breece@parks.ca.gov).

Crimes - This database contains information on calls made, reports made, and actions taken by park staff relative to crime in and near State Park System units. Data includes information on investigations, warnings given, and arrests for alleged misdemeanors and crimes.

- Contact: Law Enforcement & Emergency Services Division, California State Parks, Sacramento (916) 653-0388.

Cultural Resources: Sites, Structures, Registrations - Information on the number and type of cultural resources in the State Park System is found in the *Index to Historic and Archaeological Resources Owned by California State Parks*. This index lists, by park unit, the number of (1) archaeological sites, (2) historic structures, (3) California Historic Landmarks, (4) National Register and California Register properties, (5) National Historic Landmarks, (6) Cultural Preserves and (7) Historic American Engineering Record properties.

- Contact: Betsy Raspino-Leber, Archaeology, History and Museums Division, California State Parks, Sacramento (916) 653-9921; [betsy.leber@parks.ca.gov](mailto:betsy.leber@parks.ca.gov).

Facilities – Accessibility - In compliance with the federal Americans with Disabilities Act, California State Parks in 2001 completed a very detailed Transition Plan for accessibility in the then-266 California state parks. The Transition Plan identifies the physical barriers to access throughout the Department's programs, services, and activities, and establishes a plan for barrier removal to ensure programmatic access by people with disabilities.

- Contact Jennifer Harris, Accessibility Section, Acquisition and Development, California State Parks, Sacramento (916) 445-4144; [jennifer.harris@parks.ca.gov](mailto:jennifer.harris@parks.ca.gov).

Facilities – Data for Maintenance Purposes - For the purpose of programming California State Parks' facility maintenance activity, the tens of thousands of structures, utilities and other built facilities in the State Park System were inventoried and recorded. In this particular information system, numbers of similar facilities (e.g. individual campsites) were defined as a single facility.

- Contact Division Chief, Facilities Management Division, California State Parks, Sacramento (916) 324-0487; [karl.knapp@parks.ca.gov](mailto:karl.knapp@parks.ca.gov).

Facilities – Museum Collections - Data on the condition of facilities used to house museum collections in the State Park System is found in the Museum Collections Facility Index (MCFI) database. Facilities which house collections are surveyed

each year for compliance with museum standards for environmental conditions, security, fire protection, and documentation.

- Contact: Jena Peterson, Museum Collections Center, Archaeology, History & Museums Division, California State Parks, Sacramento (McClellan Park) (916) 825-7277; [jena.peterson@parks.ca.gov](mailto:jena.peterson@parks.ca.gov).

Facilities – Three Visitor Facility Types in Detail - Through specific annual surveys, actual counts are made of the numerous different types of (1) overnight accommodation facilities, (2) picnic facilities and (3) the number and cumulative length of non-motorized trails in each classified unit and major unclassified property of the State Park System. This data includes information on the capacity of overnight and picnic facilities to accommodate visitors.

- Contact Barry Trute, Marketing and Business Development Division, California State Parks, Sacramento (916) 653-3495; [barry.trute@parks.ca.gov](mailto:barry.trute@parks.ca.gov).

Incidents - This database contains information on public assistance events in park units that are not covered in any other public safety category, such as accidents or crimes.

- Contact: Law Enforcement & Emergency Services Division, California State Parks, Sacramento (916) 653-0388.

Interpretive programs - Data is available on types of formal and informal programs that take place in park units, things such as guided hikes, craft demonstrations, Junior Ranger programs and off-site school programs. Information is provided on the number of each type of program given, hours of programming completed, the characteristics of the presenters and visitor attendance at the programs.

- Contact: Carolyn Schimandle, Interpretation and Education Division, California State Parks, Sacramento (916) 651-8451; [carolyn.schimandle@parks.ca.gov](mailto:carolyn.schimandle@parks.ca.gov).

Legislative Districts – Each unit of the State Park System resides in all of the following political districts: US Congressional District, State Senate District and State Assembly District. To identify the political district for a park unit, go to: <http://findyourrep.legislature.ca.gov> or contact the Legislation Office.

- Contact Megan Florida, Legislation Office, California State Parks, Sacramento (916) 653-8380; [megan.florida@parks.ca.gov](mailto:megan.florida@parks.ca.gov).

The Museum System (TMS) – This is the California State Parks official statewide museum collections database. Used primarily for internal purposes, the database is organized by classifications which reflect the breadth of our collections, ranging from documentary materials and art objects to natural history and archaeological specimens to horse drawn vehicles and historic artifacts. Currently, there are over one million object records and over a half million images in TMS.

Some of our collections can be accessed through our public website, eMuseum. This site includes records and images of over 35,000 museum objects in our collections – all accessible to the general public at [www.museumcollections.parks.ca.gov](http://www.museumcollections.parks.ca.gov).

- Contact: Linda Walton, Museum Curator I, Archaeology, History & Museums Division, California State Parks, Sacramento (916) 653-3578; [linda.walton@parks.ca.gov](mailto:linda.walton@parks.ca.gov).

Photographic Archives – Hundreds of thousands of images of park units, cultural artifacts and important park-related persons are available. Media includes b/w prints and negatives, color prints and negative, 35mm slides and born digital images.

- Contact: Wil Jorae, Interpretation and Education Division, California State Parks, Sacramento (McClellan Park) (916) 263-0997; [photo.arc@parks.ca.gov](mailto:photo.arc@parks.ca.gov) or [wil.jorae@parks.ca.gov](mailto:wil.jorae@parks.ca.gov).

Reservations for Campsites, Hearst Castle ® - A large share of the system's campsites and all of the tours of Hearst Castle ® are available by reservation. Information is available on the number of camp units subject to reservation and the number of reservations actually made for camping or Hearst Castle ® tours.

- Contact Jimmy Low, Marketing and Business Development Division, California State Parks, Sacramento (916) 653-7733; [jimmy.low@parks.ca.gov](mailto:jimmy.low@parks.ca.gov).

## CHAPTER 6 - HISTORY OF THIS REPORT

The first annual *Statistical Report* for the State Park System was published for the 1961-62 fiscal year. Prior to that, information on the System's acreage, facilities, attendance, income, expenditures and staffing was available largely from scattered sources within California State Parks and were on various occasions combined into a single publication for use in special studies or reports. Exhibit 1 provides a list of the documents which are recognizable as earlier statistical reports.

Following the publication of the State Park System's first specific annual statistical report, for fiscal year 1961-62, identical or similar reports were issued covering the years through 1989-90. Most of these reports provided information for a single fiscal year, although some covered three or four fiscal years in a single volume. In a multi-year report, some items of data for a given fiscal year may be different than that which had been presented for that particular fiscal year in a previous year's report. This reflects the fact that the data was modified after the close of the original fiscal year by the addition of new information arriving after the end of the year. By convention, the data that is considered valid and used is that which is reported for the year in which the report was published, usually the smallest figure in any such series.

Over this 29-year period, these statistical reports were altered somewhat as to their title, the range of their information and their formatting. As the series developed, there was more analysis of the subject year's data and its comparison with that from previous years.

Due to an administrative reorganization and subsequent budgetary limitations, the creation and publication of the series of annual statistical reports ceased in 1990. During the following years, it became clear that such a report was needed, that it was very useful to have such information assembled annually and made readily available to staff at all levels, as well as to interested persons outside of California State Parks.

In late 2002, California State Parks' Planning Division undertook to reinstitute this publication, to develop and publish once again a State Park System statistical report with at least the scope of the last one in the series, published eleven years earlier. The 2001/02 *Statistical Report* was the first product of this new effort.

The scope of the document was expanded to provide information and analysis well beyond that found in any prior statistical report for the State Park System. Among these additions are:

- The formatting of each district's units and properties (where appropriate) in terms of the sectors into which the district was organized at the end of the fiscal year;

- Very detailed information on the definitions, source of and quality of each set of basic data, often with cautions as to its use;
- Information on the availability, source and quality of a wide range of regularly collected State Park System data that is important but the inclusion of which was beyond the scope of the basic data set of the statistical report; and
- A more detailed analysis of the year's basic data and some comparison with relevant data from earlier years, an effort that will be more useful in the coming years.

As mentioned in the Introduction, the statistics in this report are considered California State Parks' data "of record" and will be used as the basis for the reports, studies and analyses subsequently developed by Department staff.

# APPENDICES

SUTTER'S FORT, SACRAMENTO, CALIFORNIA.

## APPENDIX A - SELECTED DATA – 1990/91 TO 2000/01

As indicated in Exhibit 1, there were no issues of the State Park System annual statistical report published during the eleven fiscal years from 1990/1991 through 2000/2001. Thus, the important data which they would have contained is not available. This data gap makes it difficult to quickly find or construct a year-by-year series for the report's critical data categories, such as acreage, visitor attendance, revenue, operating costs and the like.

So that this missing data would not remain forever unavailable, an effort was made to locate it in California State Parks' hardcopy or electronic records. To locate or to create after the event at least some portion of these missing data sets, a search was made of the active or archived records of California State Parks. Appendix A of the 2001/02 *Statistical Report* contains a number of important categories of State Park System information that were located or created, thereby filling in as well as is possible the gap caused by the missing statistical reports. Those needing these data should consult that report.

As indicated in the 2001/02 *Statistical Report*, there are a variety of problems which made impossible the creation of some of the missing data in a context and format which matches that of this present document. There are many limitations in the historic data, and some of these limitations would apply even if the annual figures were readily available. In many cases, the definitions of data terms were not clear or have changed over time, making difficult a good transition in a data set from one fiscal year to a subsequent year where new definitions apply. In other cases, there may be changes in the methods of collecting data from the original field sources and processing it at headquarters.

Below the system-wide level of data, at the district-level of information, there is an insurmountable problem of consistency in the geographic aggregation of earlier unit-level data. It is not possible to be consistent because of the various field-level management reorganizations which have taken place over the eleven-year period. These reorganizations have altered the number and configurations (and even names) of the districts, and thus changed the number and identity of the units and properties which each contains.

With these factors in mind, the eleven years of missing information for the key data sets which were identified or created were presented only at the level of aggregation which reflects the State Park System as a whole. Where, over the course of the eleven years there were changes in data definitions or collection processes, these matters were noted below the data tables as warning to the reader. In spite of the recognized, albeit unavoidable, shortcomings in this data, it was considered the official data, the data "of record", for the purposes they represent.

As indicated above, these eleven-year data sets were made available in Appendix A of the 2001/02 *Statistical Report* in five sections, using in the same sequence in which the data sets appear in the table in this report's Chapter 3. These sections are:

1. Acreage
2. Public Use Facilities
3. Visitor Attendance
4. Revenue - Fees, Concessions, Miscellaneous
5. Operating Costs and Staff Levels

Where the reader seeks more detailed data than was provided in these tables, contact should be made with California State Parks' most appropriate division, office or section identified in Chapter 5.

## **APPENDIX B - PARK USE FACILITY SURVEY (PUFS) – FY 2013/14**

To obtain the public use facility information needed for the present statistical report, the Marketing and Business Development Division (formerly the Planning Division) made an exhaustive online unit-by-unit survey in the fall/winter of 2014 to get exact figures for the following types of visitor facilities:

- Overnight use facilities – individual (or “family”) and group campsites, as well as a variety of specific types of shelters, structures and commercial lodging accommodations
- Picnic facilities – individual (or “family”) and group
- Trails – number and mileage of paths and unimproved roadways available to users other than those using off-highway vehicles.

An online survey was completed by appropriate field staff for every classified unit and major unclassified property; information provided would reflect the facility inventory as it was on June 30, 2014. An example of this survey including totals for each question appears on the following pages.

As shown on the survey, this instrument broke these three broad categories down into twenty-four subcategories, each of which was carefully defined so as to be mutually exclusive of the others. The instrument also sought information on the “visitor capacity” of each subcategory of overnight use and day use facility. This figure reflects the number of people (or in one case, boats) who could occupy the facilities at one time, a factor that is sometimes termed a facility’s “instantaneous capacity.” The following 2013/14 Park Unit Facility Survey summary indicates the totals for each category and grouping of categories.

As indicated in the definition of public use facilities in Chapter 4, twenty-two of the twenty-four subcategories were combined into the six categories of public use facilities reported in Chapter 3. Because they were by their nature open-ended and poorly defined, and thus not subject to being precisely counted, the two subcategories of overflow camping were not used in the report.

A separate inventory survey of specific units that include trails and areas used by off-highway vehicles was conducted to attempt to capture data not reported since 1989-90. While most of these trails can be found in State Vehicular Recreation Areas, there are some motorized trails located in other classified units. Not all units that allow motorized vehicle use inventory their trails by calculating the number of trail miles. Because the landscape of some of these units is so open and diversified, inventorying individual trails is not practical. At these units motorized vehicular use is reported by calculating area and not miles of trails.

# STATE PARK SYSTEM: 2013-2014 FACILITY SURVEY SUMMARY

## I. Overnight Use Facilities

### A. Individual/Family Camp Sites

		2013-14 Survey Responses	
		Number of Sites	Visitor Capacity: # of people
1	<b>Primitive/undeveloped:</b> accommodates up to 8 people and two vehicles with a tent space, stove, table and nearby piped water and a chemical or vault toilet	2,638	122,262
2	<b>Developed (standard):</b> up to 8 people and two vehicles with a tent space, stove, table, nearby piped water and a restroom with flush toilets and hot water; may include showers and laundry sinks. <b>Can accommodate smaller RVs (~under 30 feet)</b>	6,786	52,738
3	<b>Developed (oversized):</b> up to 8 people and two vehicles with a tent space, stove, table, nearby piped water and a restroom with flush toilets and hot water; may include showers and laundry sinks. <b>Can accommodate smaller RVs (~over 30 feet)</b>	1,589	12,757
4	<b>RV Hookup:</b> up to 8 people and two vehicles with a paved spur for RV, stove, table and restroom with flush toilets and hot water; each site with electricity and water; sewer connection on site or in unit	1,097	8,116
5	<b>Environmental/Trail Campsite:</b> designated primitive site with a tent space, table, fire ring or stove and a pit toilet in a relatively undisturbed setting	440	3,220
6	<b>Hike-in or Bike Campsite:</b> designated area with a tent space, table, fire ring or stove, with water and toilet facilities nearby	314	2,335
7	<b>Floating Campsite:</b> tent space, table, stove and toilet facilities located on a floating platform, accessible only by boat	10	150
8	<b>Dock Berths or Off-shore Mooring Buoys:</b> please indicate the <b>number of boats</b> that can be accommodated; the vessels can be self-contained or the overnight usage may be on a site on-shore	1,292	4,320
		<b>14,166</b>	<b>205,898</b>

### B. Group Camp Sites

		2013-14 Survey Responses	
		Number of Sites	Visitor Capacity: # of people
9	<b>Tent or RV use - primitive or developed:</b> an area with space for many tents or RVs, providing tables, stoves or fire rings, access to water and toilet facilities; often used by reservation only	263	10,377
10	<b>Horse Camps - primitive or developed:</b> a group area reserved only or mainly for the use of horse groups, providing facilities needed for managing the horses; often used by reservation only	90	1,191
		<b>353</b>	<b>11,568</b>

### C. Overflow Camping Areas

		2013-14 Survey Responses	
		Number of Sites	Visitor Capacity: # of people
11	<b>Enroute/Wayside Camping:</b> overnight, self-contained RV occupancy of day-use or other paved areas, limited and specified sites, single-night only; day-use tables and sanitation facilities available	453	3,748
12	<b>Open, Casual Areas:</b> unmarked portions of open fields, dirt or gravel areas where tents and RVs may be used sometimes; support facilities may be limited	4,654	325,971
		<b>5,107</b>	<b>329,719</b>

# STATE PARK SYSTEM: 2013-2014 FACILITY SURVEY SUMMARY

Continued

		2013-14 Survey Responses	
		Number of Sites	Visitor Capacity: # of people
<b>D. Overnight (non-camping) Facilities - Structures</b>			
13	<b>Tent Cabins/Shelters:</b> semi-permanent tent on raised wood platform or three-sided shelter with roof, with a supporting table, cooking and restroom facilities	58	376
14	<b>Rustic Cabins:</b> enclosed building with appropriate facilities, some of which (restrooms) may be located outside of the building	165	852
15	<b>Yurts:</b> shelter with appropriate facilities, some of which (restrooms) may be located outside the structure	3	24
16	<b>Bark Houses:</b> Native American-type shelter with appropriate facilities, some of which (restrooms) may be located outside the structure	6	45
17	<b>Modern Lodge/Motel/Detached Cabins:</b> with rooms, usually for two occupants, with heating, electricity, hot and cold running water and restrooms; may be operated by concessionaires	475	1,634
		<b>707</b>	<b>2,931</b>
<b>II. Day-Use Facilities</b>			
<b>A. Picnic Facilities</b>		2013-14 Survey Responses	
		Number of Sites	Visitor Capacity: # of people
18	<b>Family Picnic Sites:</b> a small area with a table, stove or fire rings, with nearby parking, water and restrooms (sometimes used by groups but intended for individuals or families)	7,369	66,436
19	<b>Group Picnic Sites:</b> a large area with a number of tables, stoves or fire rings, with nearby parking, water and restroom facilities, often arranged for group use and often used by reservation only	259	18,234
		<b>7,628</b>	<b>84,670</b>
<b>III. Non-motorized Trail Use Facilities (on DPR lands only)</b>			
		2013-14 Survey Responses	
		Number of Trails	Total Miles of Trail
20	<b>Multiple Use Trails:</b> pathways/trails designated for all three user types: pedestrian, horse and bicycle	526	1,434.22
21	<b>Equestrian/Pedestrian:</b> pathways/trails where designated use excludes bicycles	281	720.62
22	<b>Bicycle/Pedestrian:</b> pathways/trails where designated use excludes horses.	127	249.73
23	<b>Pedestrian only:</b> pathways/trails where designated use excludes horses and bicycles.	809	872.55
24	<b>Primitive/Administrative Roads Used as Trails:</b> dirt/gravel routes maintained as a road but designated for trail use.	580	1,477.61
		<b>2,323</b>	<b>4,754.73</b>

## APPENDIX C - INTERNAL UNITS, MINOR SYSTEM PROPERTIES

### Internal Units

As indicated in Chapter 2, during the 2013/14 fiscal year, the State Park System consists of 263 classified units and 17 major unclassified properties, for a total of 280 units and properties. Not included in these figures are three kinds of classified units, Cultural Preserves, Natural Preserves and State Wildernesses. These units, informally termed “internal units”, are portions of or lands internal to one of the System’s basic 263 classified units. The purpose of creating such units is to provide a higher level of protection to the resources than would be required by the classification of the “parent unit”, the unit in which it is located.

Internal classified units are not listed in the table in Chapter 3. They appear in List 3 of each annual edition of California State Parks’ *Planning Milestones* publication.

There were 96 internal units in the State Park System on July 1, 2013 protecting approximately 543,303 acres within 55 parent units. Since internal units are operated as an integral part of the parent unit in which they are located, there is little data available which applies to internal units alone, other than for their classification date, county of location and acreage. There is no information available for internal units in other data categories such as public use facilities, visitor attendance, operating costs, staffing, and the like. Any information of this type which is relevant to an internal unit would be included as part of that type of information which is relevant to the parent unit as a whole.

Table C-1, following, provides the available data for internal units.

### Minor System Properties

In addition to the State Park System’s 280 classified units and major unclassified properties, there are a handful of minor, frequently very small properties, which are managed by the State Park System. Not being part of the standard Department, they are not listed in the table in Chapter 3. They are usually managed by the headquarters office of the State Park System district in which they are located.

Table C-2, below, provides the basic information on these properties.

These properties appear in List 5 of the July 1, 2013 edition of the publication *Planning Milestones for the Park Units and Major Properties Associated with the California State Park System*. Additional information on the nature and status of these properties may be found in that publication.

(\*) Office of former La Costa District, 2860 Carlsbad Boulevard, Carlsbad: granted by the Division of Forestry, recorded 2/15/73, gift value of \$250.

## APPENDIX 8 - OTHER SOURCES OF PARK SYSTEM DATA

Chapter 5 identified departmental sources that continually generate data and information about many of the field activities and operations that take place in the State Park System. In addition, there exist other sources – libraries, depositories and archives – which house collections of published materials which may contain relevant information. These sources emphasize past, historic data. The most important ones are listed below.

### A. California State Parks

Archives - California State Parks' Archives collects, organize, preserves, and makes accessible documents with long-term or permanent value. A variety of California State Parks' statistical reports, resource surveys, planning studies, interpretive reports, acquisition files, leases and deeds are located in the Archives, which also houses California State Parks' Cultural Heritage Library. This library contains a wide variety of books and other publications, of both a scholarly and general nature, published by sources outside of California State Parks.

Contact: Lola Aguilar, Archaeology, History, and Museums Division, California State Parks, (916) 653-6519, [lola.aguilar@parks.ca.gov](mailto:lola.aguilar@parks.ca.gov).

Central Records Office - This office is responsible for the systematic control of the creation, maintenance, use, and disposition of all departmental records relevant to California State Parks' decision-making and activities. Records include documentary materials, books, electronic data, maps, moving images, papers, photographs, sound recordings, made or received by California State Parks in the transaction of public business. This activity is in response to the State Records Management Act.

- Ted Holm, Records Management Analyst II (Specialist), Central Records Office, Administrative Services Division, California State Parks (916) 445-9017; [ted.holm@parks.ca.gov](mailto:ted.holm@parks.ca.gov).

Internal Departmental "Libraries" - Certain of California State Parks' organizational components house reference libraries and collections containing materials of value to the performance of their function. Information on various aspects of the State Park System may be sought from these sources, which are located as follows:

- Archaeology, History and Museums Division
- Interpretation and Education Division
- Natural Resources Division
- Northern Service Center
- Marketing and Business Development Division

## B. Other Sources

California State Library (Sacramento) – This library’s Government Publications Section contains a vast collection of reports, surveys, special studies and yearbooks containing information on the full range of California’s agencies, departments, bureaus and boards.

- Contact: Reference Desk, Government Publications Section, California State Library, 914 Capitol Mall, MS E-29, P.O. Box 942837, Sacramento, CA 94237-0001; 916-654-0069; 916-653-6114 (fax); email: [cslgps@library.ca.gov](mailto:cslgps@library.ca.gov). Hours of operation: 9:30 AM-4 PM, Monday-Friday.

National Association of State Park Directors – Annual Information Exchange series. – Starting with fiscal year 1979, this organization has produced an annual statistical report which encompasses all of the nation’s state park systems. Each lengthy report contains many data series, including acreage, facilities, attendance, and information on each system’s fiscal and personnel matters. In some categories, this Department’s definitions (and thus its data) must be altered to fit the needs of the NASPD publication.

- Contact: NASPD, 8829 Woodyhill Road, Raleigh, NC 27613; (919) 676-8365  
<http://www.naspd.org>.

## **APPENDIX 9 – UNIT EXPENDITURE DETAIL REPORT**

Appendix E displays the Unit Expenditure Detail Report which is an examination of the State Park System's budget for support expenditures. The costs for the State Park System fall into two main categories:

- Direct Costs (Operating Costs) - These costs include expenditures and encumbrances which directly benefit a park unit. Some examples are staffing and operating expenses.
- Indirect Costs - These costs include expenditures and encumbrances which indirectly benefit all park units. One example is the Department's administrative operation which benefits all park units. These costs are identified as Distributed Administration and Core Programs.

The purpose of including these data into this statistical report is to provide a more complete picture of the Department's support expenditures.

These data are provided by the California State Parks', Administrative Services Division, Budget Section.
